

Construct a Decision Tree in Amua

Capstone Exercise 2

Objectives

- Construct a decision tree in Amua comparing the status quo to your specific strategy(ies)
- Parameterize decision tree and estimate outcomes
- Use known parameters, if possible
- It is ok to use educated guesses (assumptions) if parameters are unknown at this time

Deliverables

- Create slide for final presentation that graphically displays your decision options using a decision tree
- Slide 5 – Decision tree graphic with expected values How do they copy the decision tree graphic out of Amua into PPT?
